Professional Summary

B.Tech Information Technology student focused on frontend development, with hands-on experience building responsive web interfaces using HTML, CSS, JavaScript, and React. Experience creating dashboards, search and filter interfaces, and web applications integrated with REST APIs, backed by a Java and Spring Boot foundation and strong fundamentals in DSA, OOP, and DBMS.

Education

B.P. Poddar Institute of Management and Technology — **Kolkata, West Bengal**
B.Tech in Information Technology — CGPA: 7.4/10 — *2023 – 2027*

High School Koransarai, BSEB — **Bihar**
Class XII — 82% — *2022*

DAV Public School, Dumraon, CBSE — **Bihar**
Class X — 84% — *2020*

Technical Skills

Programming Languages: JavaScript, Java, Python, SQL
Frontend Technologies: HTML, CSS, JavaScript, React, Responsive Web Design
Backend & APIs: Spring Boot, REST API Development
Databases: MySQL, PostgreSQL, Database Design
Developer Tools & Deployment: Git, GitHub, Postman, VS Code, IntelliJ IDEA, Maven, Docker, Vercel, Render
Core Computer Science: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks, System Design Basics

Projects

Borrower Copilot — **Live Demo**
Tech Stack: HTML, CSS, JavaScript
- Built a web-based borrower self-assessment tool that evaluates loan affordability and provides guidance on borrowing amount, fair interest rate, and recommended EMI.
- Implemented an adaptive question flow based on income type and a rule-based calculation engine for affordability, sanction estimates, APR, and 20% income-drop stress scenarios.
- Developed explainable results with confidence levels and a Negotiation Card, using documented rules and assumptions instead of a machine-learning credit model.

Mini ATS – Applicant Tracking System — **Live Demo**
Tech Stack: React, Java, Spring Boot, PostgreSQL, Docker Compose
- Built a React interface for recruiters to add and manage candidate details, connected to a Spring Boot REST API and PostgreSQL database.
- Created a dashboard with summary cards, a hiring pipeline view, and top positions to show hiring progress at a glance.
- Added search, stage and experience filters, a paginated candidate list, and a light/dark mode toggle; deployed live on Render.

Airbnb Clone — **Live Demo**
Tech Stack: HTML, CSS, JavaScript
- Built a responsive clone of an Airbnb listing page, recreating the layout and key listing details (guests, bedroom, bed, bathroom) of a serviced apartment in Candolim.
- Designed the page to match Airbnb's look and feel and adapt to different screen sizes.
- Deployed the project live on Vercel.

Experience

InAmigos Foundation — **Remote**
Web Developer Intern — *Aug 2026 – Sep 2026*
- Designed and developed a personal portfolio website from scratch using HTML, CSS, and JavaScript, featuring a custom UI, scroll animations, and responsive mobile navigation.
- Conducted a website analysis of the organization's existing site and delivered actionable improvement suggestions to the team.

Achievements & Certifications

- Solved 300+ Data Structures and Algorithms (DSA) problems across LeetCode and GeeksforGeeks.
- Oracle Java Foundations Certification.
- HackerRank Software Engineer Certificate – Credential Link.
- HackerRank SQL (Basic) Certificate – Credential Link.

Leadership & Activities

- Core Member, TechStorm – Contributed to organizing and coordinating technical events and workshops at the college.
- Participated in TVS Credit E.P.I.C 8.0 – IT Challenge, Oct 2026.
