Shivam Sinha

Kolkata | +91 6205560579 | Email | LinkedIn | GitHub

Professional Summary

B.Tech Information Technology student with a strong backend foundation in Java, Spring Boot, and REST API development, plus hands-on full stack experience building end-to-end applications with React, PostgreSQL, MySQL, and Docker. Solid grounding in Data Structures & Algorithms, OOP, and DBMS, with experience designing APIs, database-driven features, and deploying projects live.

Education

B.P. Poddar Institute of Management and Technology — **Kolkata, West Bengal**
B.Tech in Information Technology — CGPA: 7.4/10 — *2023 – 2027*

High School Koransarai, BSEB — **Bihar**
Class XII — 82% — *2022*

DAV Public School, Dumraon, CBSE — **Bihar**
Class X — 84% — *2020*

Technical Skills

Programming Languages: Java, Python, SQL
Backend Development: Java, Spring Boot, REST API Development, JDBC, Kafka
Frontend Technologies: HTML, CSS, JavaScript, React
Frameworks & Libraries: Spring Data JPA, Hibernate
Databases: MySQL, PostgreSQL, Database Design
DevOps & Tools: Docker, Docker Compose, Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code, Render
Core Computer Science: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks, System Design Basics

Projects

ShadowGuard – AI-Powered Shadow API Risk Analyzer — **Live Demo**
Tech Stack: Java, Spring Boot, React, MySQL, REST API
- Built a security-focused full-stack platform to discover runtime APIs and identify undocumented Shadow APIs by comparing them against documented OpenAPI specifications.
- Implemented automated risk scoring and classification based on API documentation status and authentication needs.
- Developed a React dashboard to monitor documented, discovered, Shadow, and high-risk APIs with AI security analysis.

Mini ATS – Applicant Tracking System — **Live Demo**
Tech Stack: Java, Spring Boot, PostgreSQL, React, Docker Compose
- Built an Applicant Tracking System with Spring Boot and PostgreSQL that makes it easy for recruiters to manage candidate details, containerized with Docker Compose and deployed on Render.
- Tracked every candidate through hiring stages (Applied, Screening, Interview, Offer, Hired, Rejected) with stage history.
- Added search and filters by name, skill, position, stage, and experience, with a paginated candidate list.
- Created a dashboard showing total candidates, hire rate, pipeline stage counts, and top positions.

AI Resume Analyzer — **Live Demo**
Tech Stack: Python, Flask, HTML, CSS, JavaScript
- Built an AI-powered web application that extracts resume content from PDF files and evaluates it against job descriptions.
- Implemented ATS-style scoring with keyword-based skill extraction, matched/missing skill analysis, and improvement suggestions.
- Generated downloadable PDF reports using ReportLab and deployed the application on Render.

Experience

InAmigos Foundation — **Remote**
Web Developer Intern — *Aug 2026 – Sep 2026*
- Designed and developed a personal portfolio website from scratch using HTML, CSS, and JavaScript, featuring a custom UI, scroll animations, and responsive mobile navigation.
- Conducted a website analysis of the organization's existing site and delivered actionable improvement suggestions to the team.
- Collaborated with cross-functional team members using Git/GitHub version control, following Agile-style workflows including sprint discussions and team meetings.

Achievements & Certifications

- Solved 300+ Data Structures and Algorithms (DSA) problems across LeetCode and GeeksforGeeks.
- Oracle Java Foundations Certification.
- HackerRank Software Engineer Certificate – Credential Link.
- HackerRank SQL (Basic) Certificate – Credential Link.

Leadership & Activities

- Core Member, TechStorm – Contributed to organizing and coordinating technical events and workshops at the college.
- Participated in TVS Credit E.P.I.C 8.0 – IT Challenge, Oct 2026.
